

## **General Moly Announces NYSE American Suspends Trading in Common Stock and Commences Delisting Proceedings**

**LAKEWOOD, COLORADO**, October 1, 2020 – General Moly, Inc. (the “Company”) (**TSX: GMO**), the only western-exchange listed, pure-play molybdenum mineral development company, today announced that the staff of NYSE Regulation has determined to commence proceedings to delist the Company’s common stock from the NYSE American Exchange. Trading in the Company’s common stock has been suspended.

As previously announced, the Company is currently below compliance with the \$2 million, \$4 million, and \$6 million stockholders’ equity requirements of Sections 1003(a)(i), (ii), and (iii) of the NYSE American Company Guide (the “Company Guide”), respectively. The Company informed the Exchange that it does not intend to submit a business plan that would result in compliance with the applicable Exchange continued listing requirements. As a result, NYSE Regulation has determined that the Company is no longer suitable for listing pursuant to Section 1009 of the Company Guide. In addition, the Company had also fallen below the low selling price requirement of Section 1003(f)(v) of the Company Guide.

The NYSE American will apply to the Securities and Exchange Commission to delist the Company’s securities upon completion of all applicable procedures, including any appeal by the Company of the NYSE Regulation staff’s decision.

The Company has a significant working capital deficit and there remains substantial doubt about the Company’s ability to continue as a going concern. If the Company is unable to find an additional source of funding, it will be forced to cease operations and pursue restructuring or liquidation alternatives, including the filing for bankruptcy protection, in which event the Company’s common stock would likely become worthless and investors would likely lose their entire investment in the Company. In addition, holders of the Company’s outstanding convertible preferred stock and senior notes would likely receive significantly less than the principal amount of their claims and possibly, no recovery at all. As of the date of this news release, the Company has no commitments for additional funding and there can be no assurance that the Company will be successful in obtaining the financing required to complete the Mt. Hope Project, or in raising additional financing in the future on terms acceptable to the Company, or at all.

### **About General Moly**

General Moly is a U.S.-based, molybdenum mineral exploration and development company listed on the Toronto Stock Exchange under the symbol **GMO**. The Company’s primary asset, an 80% interest in the Mt. Hope Project located in central Nevada, is considered one of the world’s largest and highest grade molybdenum deposits. General Moly’s goal is to become the largest primary molybdenum producer in the world.

Molybdenum is a metallic element used primarily as an alloy agent in steel manufacturing. When added to steel, molybdenum enhances steel strength, resistance to corrosion and extreme temperature performance. In the chemical and petrochemical industries, molybdenum is used in catalysts, especially for cleaner burning fuels by removing sulfur from liquid fuels, and in corrosion inhibitors, high performance lubricants and polymers.

**Forward-Looking Statements**

Statements herein that are not historical facts are “forward-looking statements” within the meaning of Section 27A of the Securities Act, as amended and Section 21E of the Securities Exchange Act of 1934, as amended and are intended to be covered by the safe harbor created by such sections. Such forward-looking statements involve a number of risks and uncertainties that could cause actual results to differ materially from those projected, anticipated, expected, or implied by the Company. These risks and uncertainties include, but are not limited to availability of cash to continue ongoing operations and the possibility of seeking bankruptcy protection, that COVID-19 is having and will continue to have an effect on financing efforts to improve liquidity, availability of insurance, metals price and production volatility, global economic conditions, currency fluctuations, increased production costs and variances in ore grade or recovery rates from those assumed in mining plans, exploration risks and results, reclamation risks, political, operational and project development risks, ability to maintain required federal and state permits to continue construction, and commence production of molybdenum, copper, silver, lead or zinc, ability to identify any economic mineral reserves of copper, silver, lead or zinc; ability of the Company to obtain approval of its joint venture partner at the Mt. Hope Project in order to mine for molybdenum, copper, silver, lead or zinc, ability to raise required project financing or funding to pursue an exploration program related to potential copper, silver lead or zinc deposits at Mt. Hope, ability to respond to adverse governmental regulation and judicial outcomes, and ability to maintain and /or adjust estimates related to cost of production, capital, operating and exploration expenditures. For a detailed discussion of risks and other factors that may impact these forward looking statements, please refer to the Risk Factors and other discussion contained in the Company's quarterly and annual periodic reports on Forms 10-Q and 10-K, on file with the SEC. The Company undertakes no obligation to update forward-looking statements.
